

ARNAB JANA

Cybersecurity & Software Engineer

Email: arnab.jana2228@gmail.com | Phone: +91 8317842228 | LinkedIn: [linkedin.com/in/arnab-jana-a439a028b](https://www.linkedin.com/in/arnab-jana-a439a028b) | GitHub: github.com/Arnab0513

EDUCATION

B.Tech in Computer Science & Engineering Institute of Engineering and Management (IEM), Kolkata	7.52 CGPA 2023 - Present
Senior Secondary Class XII (Science) Chhotakhelna Surendra Smriti Vidyamandir	73% Score Completed 2023
Secondary Class X Chhotakhelna Surendra Smriti Vidyamandir	92% Score Completed 2021

PROFESSIONAL EXPERIENCE

AI & Software Development Intern Infosys (Remote)	Aug - Oct 2025
- Assisted in refining regression analytics pipelines for the RealtyAI prediction node. - Utilized Pandas and Scikit-learn to filter, clean, and pre-process unstructured demographic logs. - Visualized database anomalies using Matplotlib graphs during engineering syncs and team stand-ups. - Collaborated within Agile frameworks, participating in system requirement and design reviews.	

TECHNICAL PROJECTS SHOWCASE

TaskFlow [Flask, SQLAlchemy, OTP Layer] A full-stack task manager featuring strict RBAC models, server-side data sanitization filters, and session handling blocks.	github.com/Arnab0513
HexaShield [Python Sockets, SQLite, Log Parser] Deception socket ports listening on SSH (22) and HTTP (80) to capture unauthorized port scanning and payloads.	github.com/Arnab0513
ChainGuard [Cryptography, Bash Scripts, Data Integrity] A cryptographically chain-linked log engine validating changes to system logs via SHA-256 hashes.	github.com/Arnab0513
Sentinel AI [Python, NLP Filters, Tokenization] A lightweight keyword-matching customer support intent router using tokenization filters for classification.	github.com/Arnab0513
Nexus Dashboard [Flask, Chart.js, JSON Ingestion] A cybersecurity event monitoring system visualizing real-time intrusion flags and threat severity sorting.	github.com/Arnab0513
Secure Review [AST Parsing, Regex Audit, Flask Security] A static code scanner parsing Python Flask applications for SQL injection vulnerabilities and missing token flags.	github.com/Arnab0513

CERTIFICATIONS

Advanced System Security Topics University of Colorado Boulder (via Coursera)	Oct 2024
Cybersecurity Job Simulation Mastercard (via Forage)	May 2024
Agile Methodology Job Simulation Cognizant (via Forage)	May 2024

TECHNICAL SKILLS

Programming Stacks: Python, JavaScript, Node.js, C Language, HTML5/CSS3
Cybersecurity Stacks: Penetration Testing, OWASP Core, Sockets Networking, Intrusion Detection, Honeypots
AI / ML Stacks: NLP, Intent Routing, Data Analytics (Pandas/NumPy), Predictive Classifiers
Backend & DevOps: Flask, SQLAlchemy, SQL Database Design, Git Version Control, Linux Shell Automation
Spoken Languages: English (Professional) | Hindi (Native) | German (Fluent)
