PROFILE

Computer Science student in the fourth year, specializing in IoT, Cybersecurity, and Blockchain Technology. Built five independent projects and one group project covering secure web applications, threat detection tooling, and AI systems. Completed a 3-month remote internship at Infosys on a machine learning project under sprint deadlines. Proficient in full- stack development and application security.

EDUCATION

Degree	Institute / Board	Result	Year
B.Tech. in CSE (IoT, Cybersecurity and Blockchain Technology)	Institute of Engineering and Management, Kolkata	7.7 CGPA (6th - Sem)	2023 - Present
Higher Secondary (WBCHSE)	Chhotakhelna Surendra Smriti Vidyamandir	73%	2023
Secondary (WBBSE)	Chhotakhelna Surendra Smriti Vidyamandir	92%	2021

INTERNSHIP

Infosys, Technology and Consulting Division Aug 2025 - Oct 2025 Remote

AI and Software Development Intern

- Contributed to RealtyAI, a real estate price prediction project; cleaned and processed over 500 property records using Python andPandas.
- Assisted in training regression models by running feature set experiments and reporting findings to the senior ML engineeroverseeing the pipeline.
- Created Matplotlib dashboards to visualize price distribution and outlier patterns, presented during bi-weekly sprint reviews.
- Followed Agile practices across daily stand-ups and bi-weekly sprints throughout the 3-month engagement.

PROJECTS

Sentinel AI - Insider Fraud and Anomaly Detection System

Tools: Python ,NLTK,NLP,IntentClassification, RESTAPIs,Tokenization

GitHub: github.com/Arnab0513/Sentinel | Live: arnab0513.github.io/Sentinel

- Engineered an NLP-based intent classification syste m thatroutes customer queries across billing, returns, and support categoriesusing keyword tokenization and NLTK-powered intent matching.
- Achieved 80% routing accuracy (24 of 30 test cases) on manually curated queries; demonstrated live at the hackathon final withina 24-hour development sprint.

Nexus: Cybersecurity Monitoring Dashboard (Group Project)

Tools: Python ,Flask,JavaScript,Chart.js,CSS

GitHub: github.com/Arnab0513/Nexus-Threat-Detaction-Platfrom

- Implemented the front-end dashboard for a 3-person team using Chart.js to render real-time charts of simulated security events byseverity and time.
- Wrote the Flask log ingestion endpoint that accepts JSON security events and appends them to the log file consumed by thefront-end on each page refresh.

Smart Surveillance & Bluetooth-Controlled Robot Car

Tools: ESP32- CAM, Arduino, Embedded C, Bluetooth (HC-05), L298N Motor Driver

- Developed a Bluetooth-controlled rob ot car using Arduino with ESP32-CAM for real-time video streaming.
- Integrated Bluetooth communication, motor control, an d wireless surveillance for remote navigation and monitoring.

SKILLS

Programming Languages: Python, C, JAVA, JavaScript, HTML5, CSS3

Cybersecurity: Web Application Security, SQL Injection Prevention, Session Management,

Honeypot Design, Secure Logging, Intrusion Detection, Network Security

Web Development: Flask, REST APIs, Front-End Development, OTP Authentication, Role-Based Access Control, Chart.js

Tools and Practices: Git, GitHub, VS Code, Linux, Agile, Scrum

CORE SUBJECTS

Data Structures and Algorithms | Database Management Systems | Operating Systems

LANGUAGES

English (Professional) | Hindi (Native) | German (Basic)

ACHIEVEMENTS

- Completed a 3-month remote internship at Infosys, contributing to data preparation and ML visualization for a real estate analysis project.
- Delivered five independent projects and one group project in Cybersecurity and full-stack development.

CERTIFICATIONS

- Advanced System Security Topics – University of Colorado Boulder (Coursera)
- Cybersecurity Job Simulation – Mastercard (Forage)
- Agile Methodology Job Simulation – Cognizant (Forage)
